

# Havis Angled Equipment Brackets

## Keep it safe with low-profile Mounting Solutions

New angled equipment brackets keep your equipment and computer mounting solution as low-profile as possible. This 30° angled bracket allows long radio and control heads to be mounted in C-SM series with minimal protrusion. For best results the bracket and equipment should be mounted at the top of the console to maximize depth.

Part numbers available:

- C-EB30-MMT-1P-A
- C-EB30-MCS-1P-A
- C-EB40-PAN-1P-A

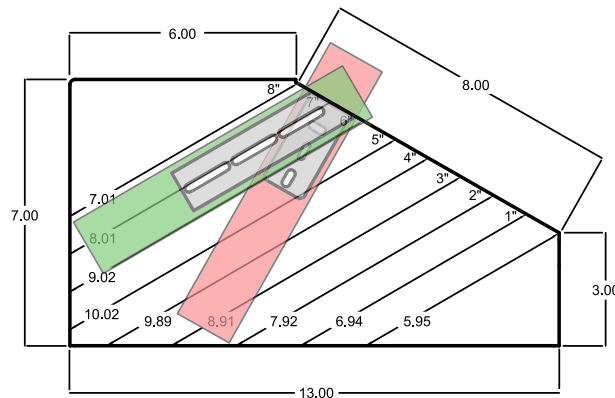

Part # C-EB30-MMT-1P-A shown

## Equipment bracket comparison

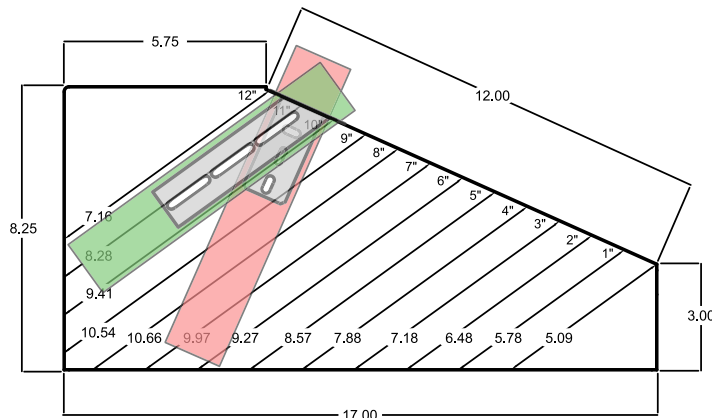

### C-SM-830 Console

Overall Width = 9.00"

### C-SM-1225 Console

Overall Width = 9.00"

Device mounted with Angled Equipment Bracket
