

Product Discontinuation Notice / Last Time Buy
Legacy Battery Equalizers and DC-DC Converters
April 25, 2022

Vanner Inc is announcing the product obsolescence of our legacy Battery Equalizer and DC-DC Converter products, effective immediately. The legacy products listed below have been replaced by products built on Vanner’s newer generation electronic platforms.

This change will assure availability of electronic components as legacy product components have or will come to the end of their life cycle. The newer generation and more modern designs result in more efficient products for our customers.

Some of the replacement products below will be a similar fit, form, and function to the legacy products. Some may require mechanical and/or electrical changes if replacing an in-service unit. Contact your Vanner Representative, or Vanner’s Vehicle System Integration Team, if you have questions on replacement product fit or function.

Vanner will offer a Last Time Buy opportunity for the remaining legacy inventory. Last Time Buy orders will be processed on a first come, first served basis.

| <u>Discontinued Product</u> | <u>Replacement Product</u> | <u>Last Time Buy Quantity On-Hand</u> |
|-----------------------------|----------------------------|---------------------------------------|
| 60-10B | VE-30 | 20 |
| 60-20A | VE-30 | 100 |
| 90-20A | VC-30 | 13 |
| 90-50A | 92-50 | 200 |
| 91-10A | 91-45 | 60 |

Contact Vanner Customer Care to inquire about inventory on-hand and/or to place an order. Send purchase orders to insidesales@vanner.com, or call Customer Care at 800 AC POWER.

Sincerely,

Bruce Beegle
Vice President – Sales & Marketing
Vanner Inc.
